

Stakefolio

Get started with staking

Setup a
new wallet

I already have
a wallet

Stakefolio

Setup a new wallet

We recommend
Keplr

Leap is a good
alternative

*Keplr and Leap are recommended for their ease of use with the Cosmos family of blockchains.
There are many other wallets to choose from, all with their own suite of features, options, and supported chains.

Stakefolio

We will continue the tutorial with Keplr, other wallets will have similar functionality.

Easy

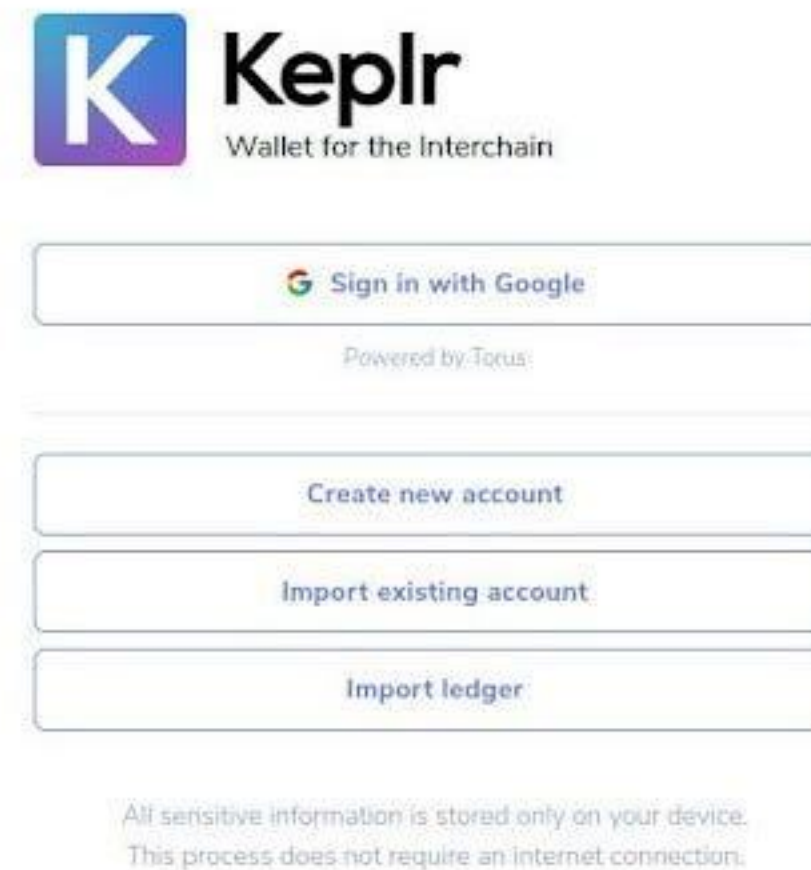

Sign in with Google

- Most convenient
- Just into any device with your Google account

Advanced

Ledger Hardware Wallet

- Most secure
- Requires confirmation with device for every transaction

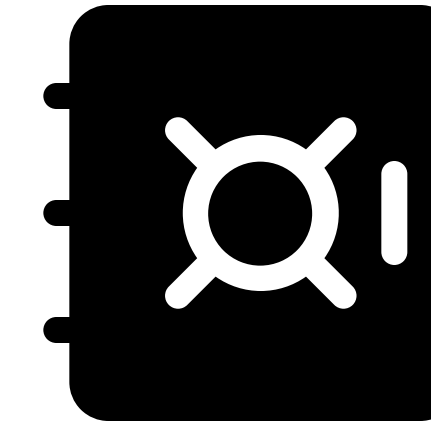

Medium

Create Recovery Phrase

- More secure
- Requires the recovery phrase to sign into additional devices or recover your account

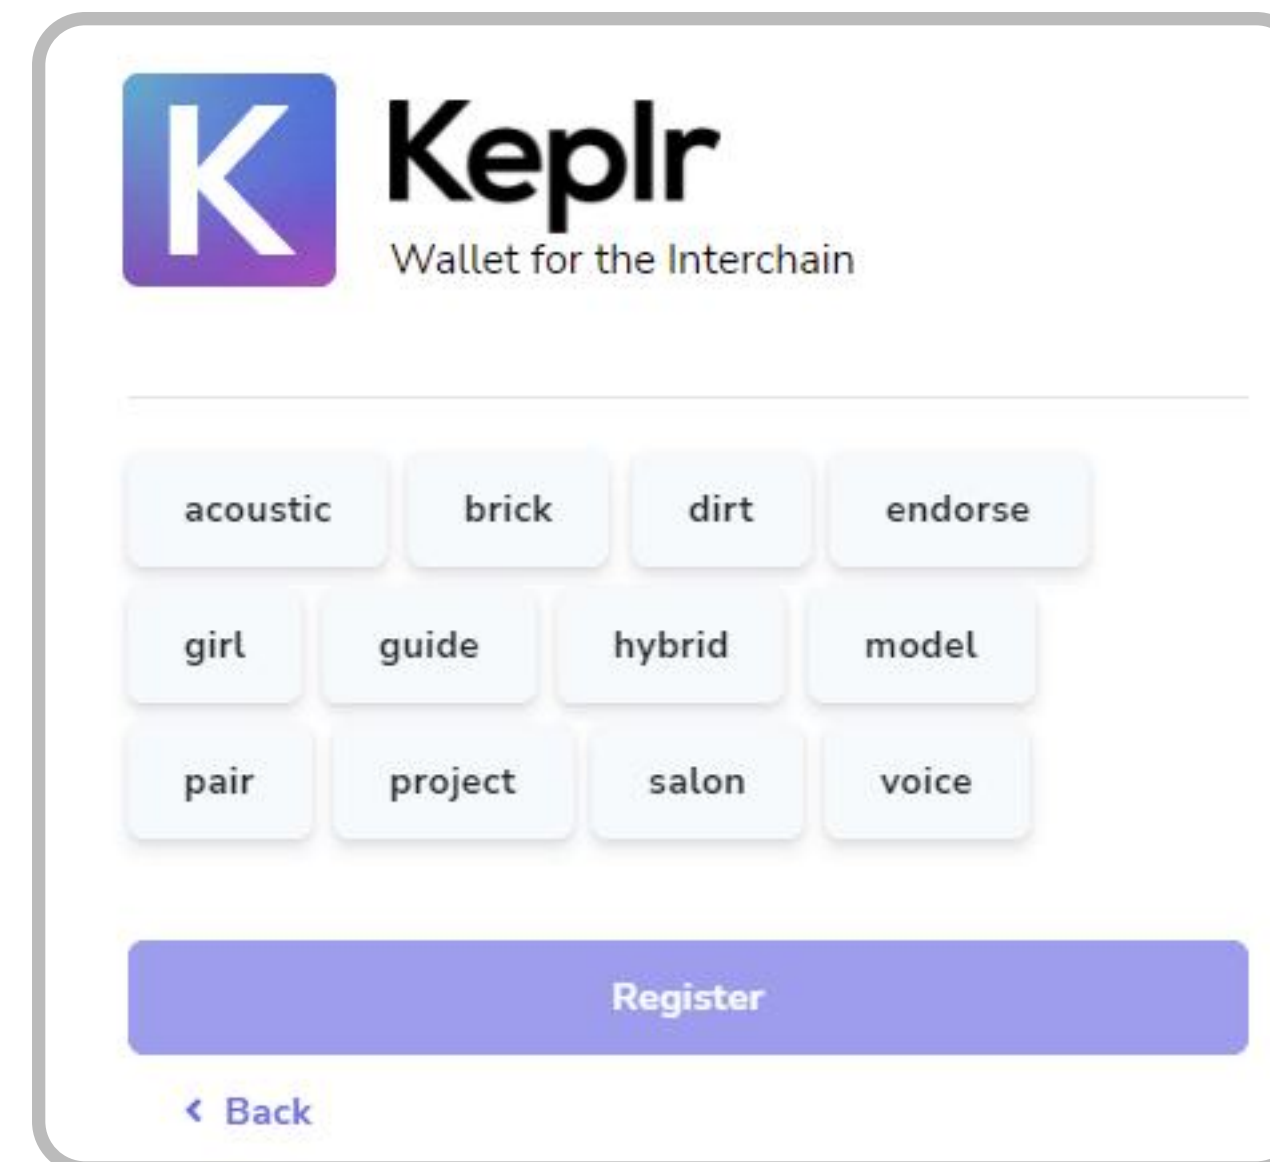

Stakefolio

Seed Phrase

Create 12 or 24 word recovery phrase

- More words, more secure
- This phrase gives access to your wallet

Safely store recovery phrase

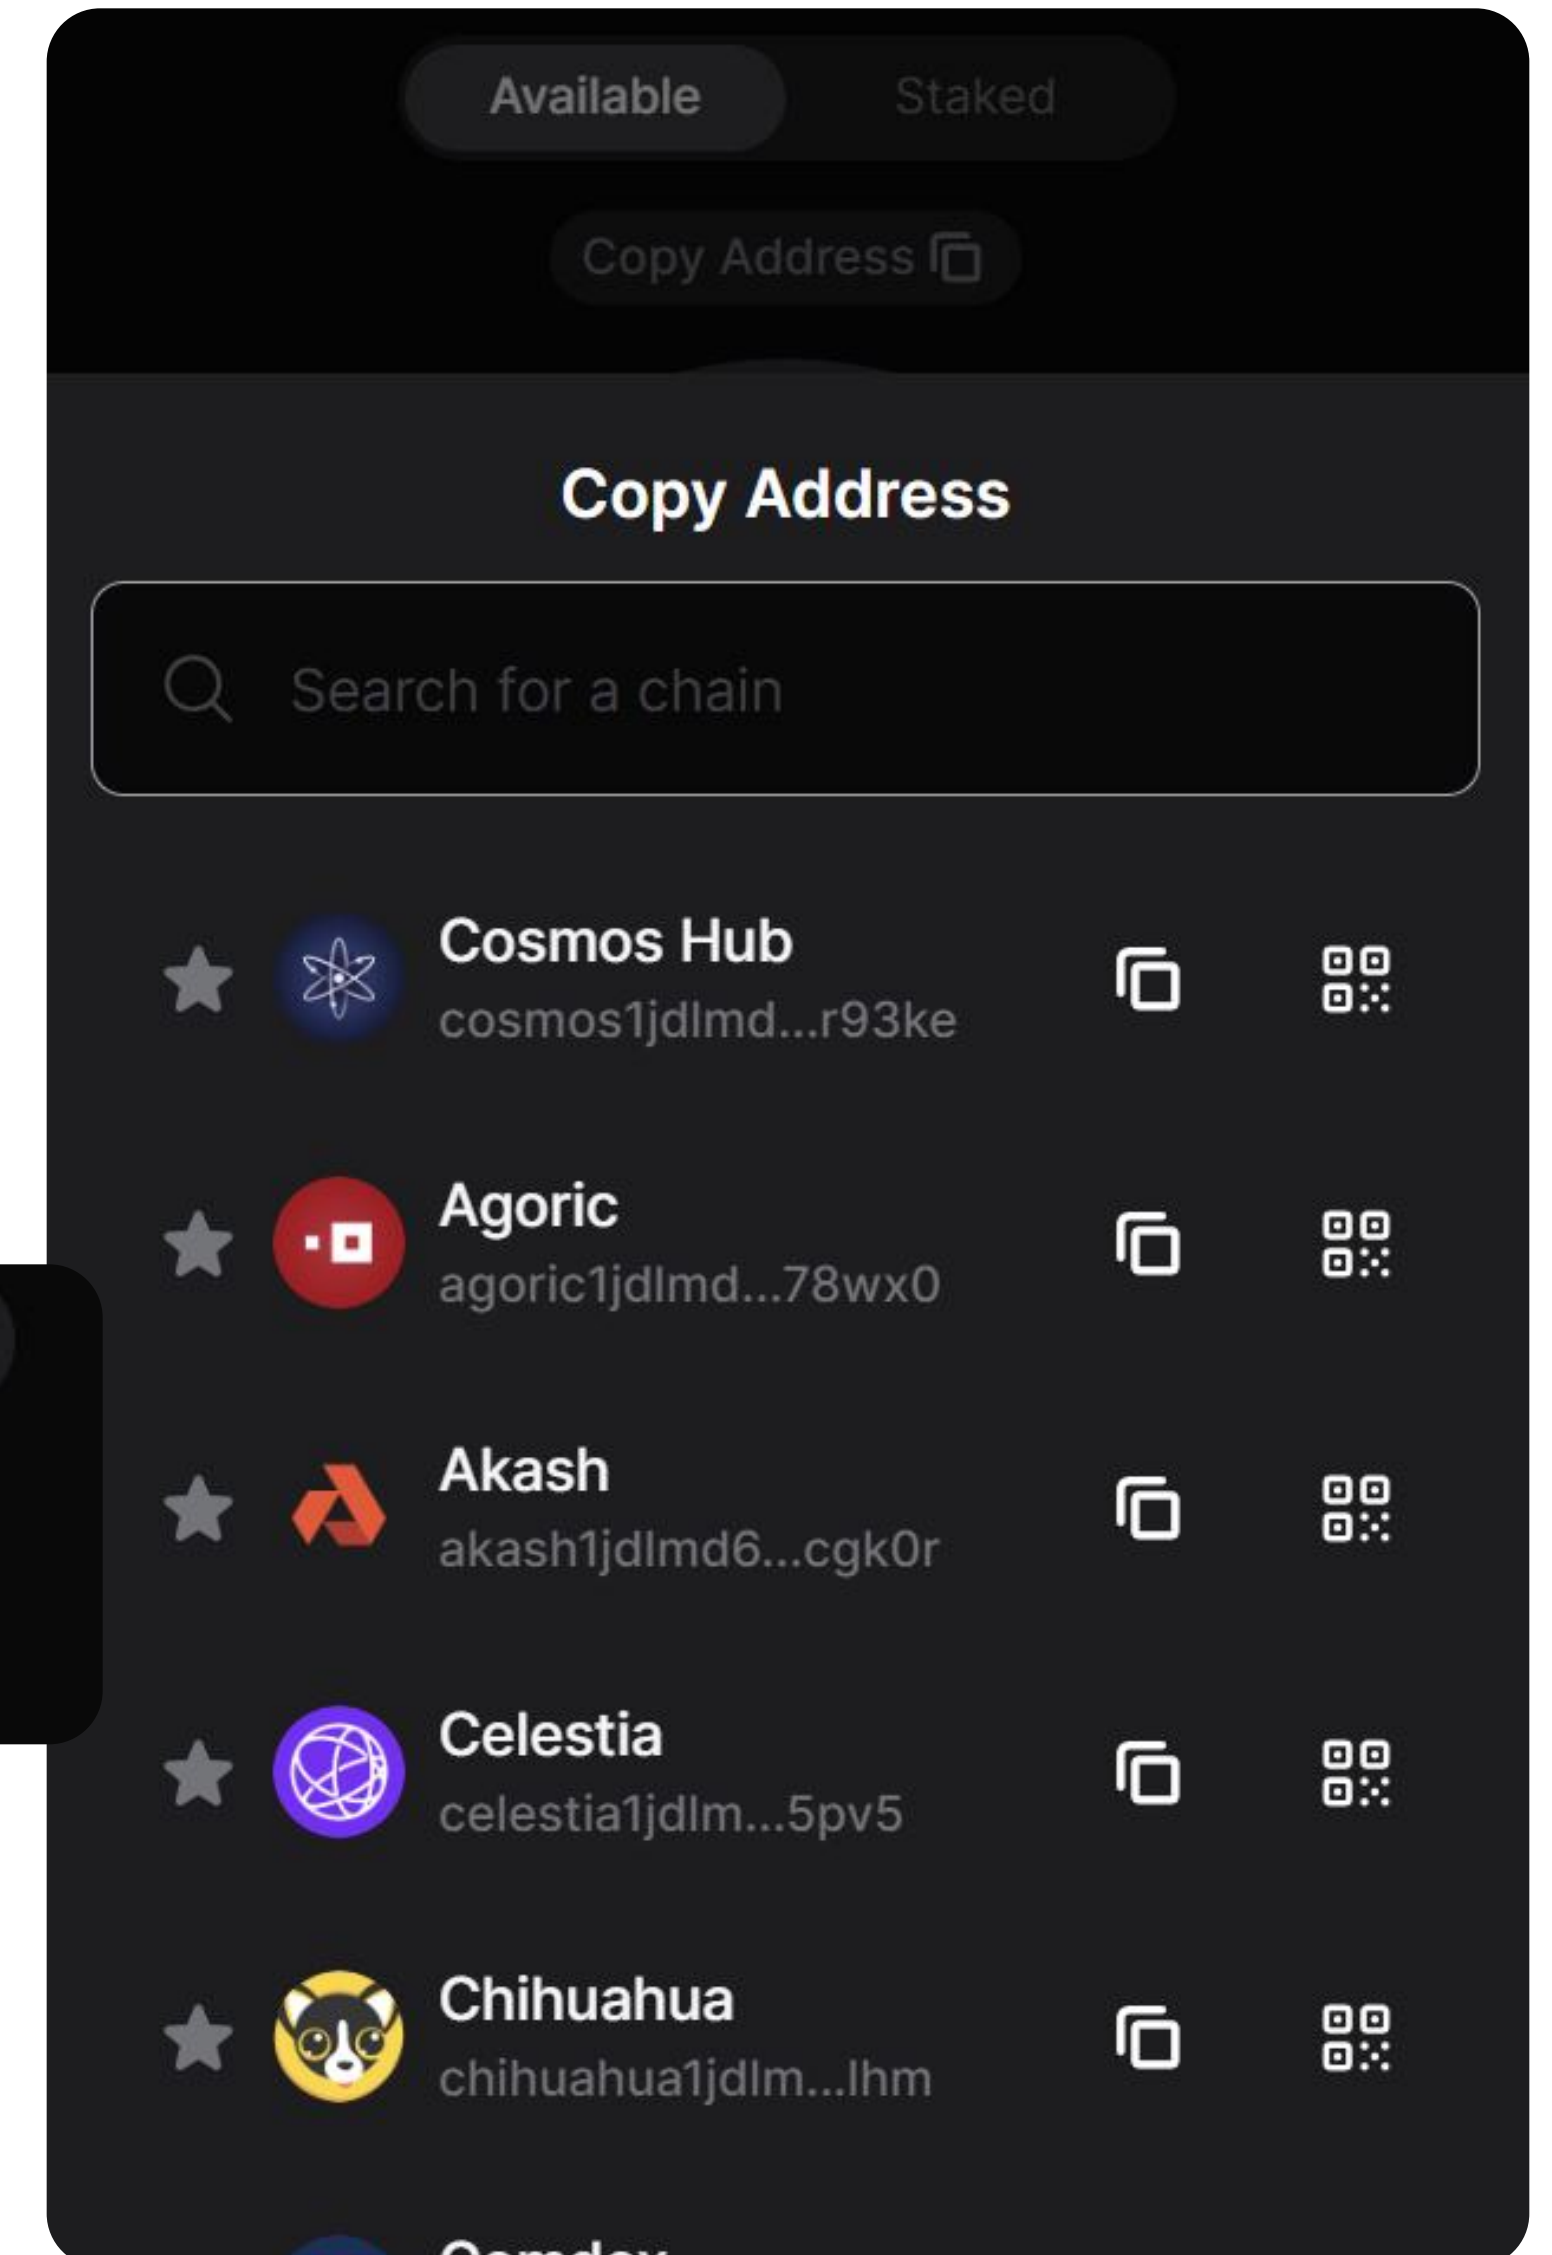

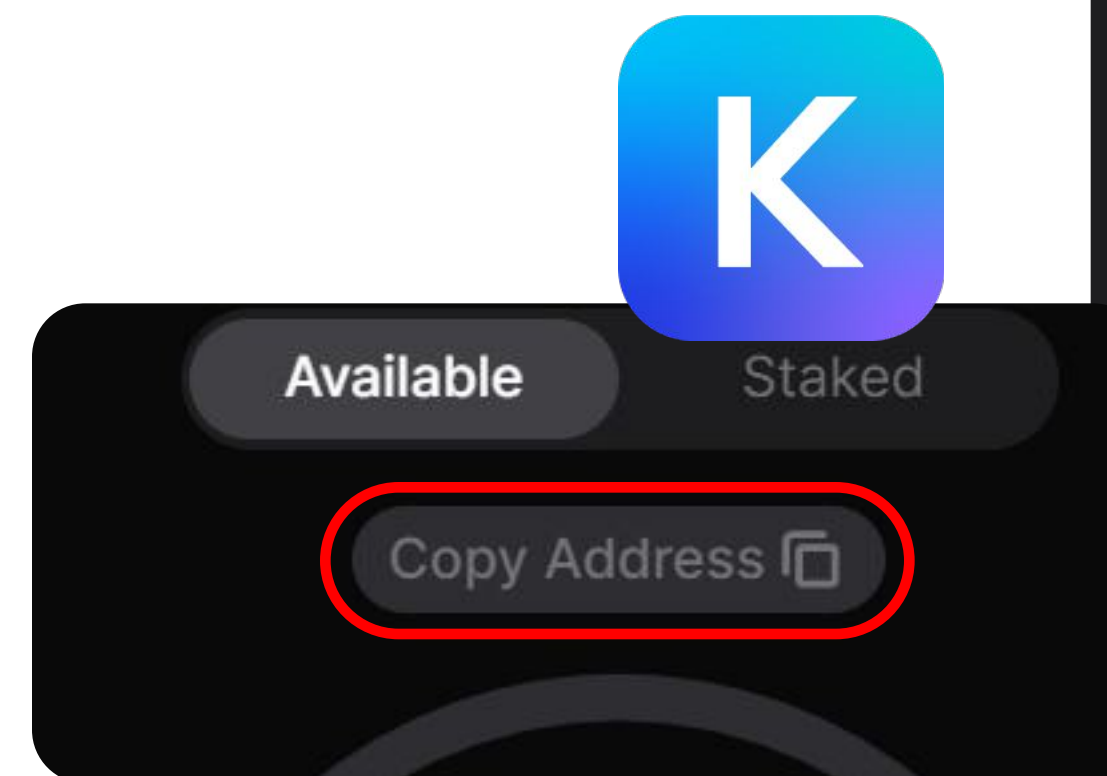

- Without it, you will be unable to recover your wallet
- Write it out, put it in a safe, put it in a secure deposit box, etc.

Stakefolio

Wallet created

Your public wallet addresses

- This is where you can find the receiving addresses of your wallet
- You have a different address for each blockchain, all connected to your recovery key
- Copy the address to the blockchain you wish to send assets to

Stakefolio

Fund your wallet

Onramp

Deposit funds
with Kado

- Deposit **ATOM** to **Cosmos Hub** chain
- Send funds to the address copied from your wallet
- Or connect your wallet directly for ease of use

The image shows two overlapping screenshots of the Stakefolio mobile application. The left screenshot displays a transaction screen with 'Buy' and 'Sell' tabs. The 'Pay' section shows 1000 CAD, and the 'Receive' section shows 88.5439 ATOM from the Cosmos Hub chain. A 'To' field is present with a 'Connect' button. At the bottom, there is a large blue button labeled 'Enter Wallet Address'. The right screenshot shows the 'Send To' screen, which prompts the user to 'Enter the receiving wallet destination' with a text input field and a 'Confirm' button. Below this, under the heading 'Connect your wallet', there are three options: 'Keplr' with a 'Connect' button, 'Leap' with an 'Install' button, and 'Compass' with an 'Install' button.

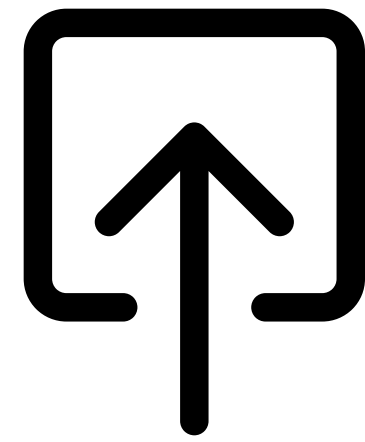

Alternate (exchanges)

- Kraken
- Coinbase
- Coinsquare

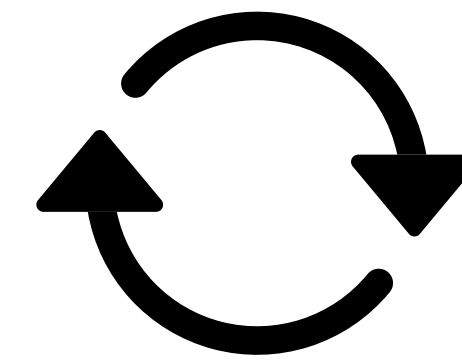

* More complicated

Choose Chain to Stake

Staking Dashboard

Manage your staking portfolio

- From your wallet, select **Manage Portfolio** to open the **Keplr Dashboard**
- Select the blockchain to get an overview

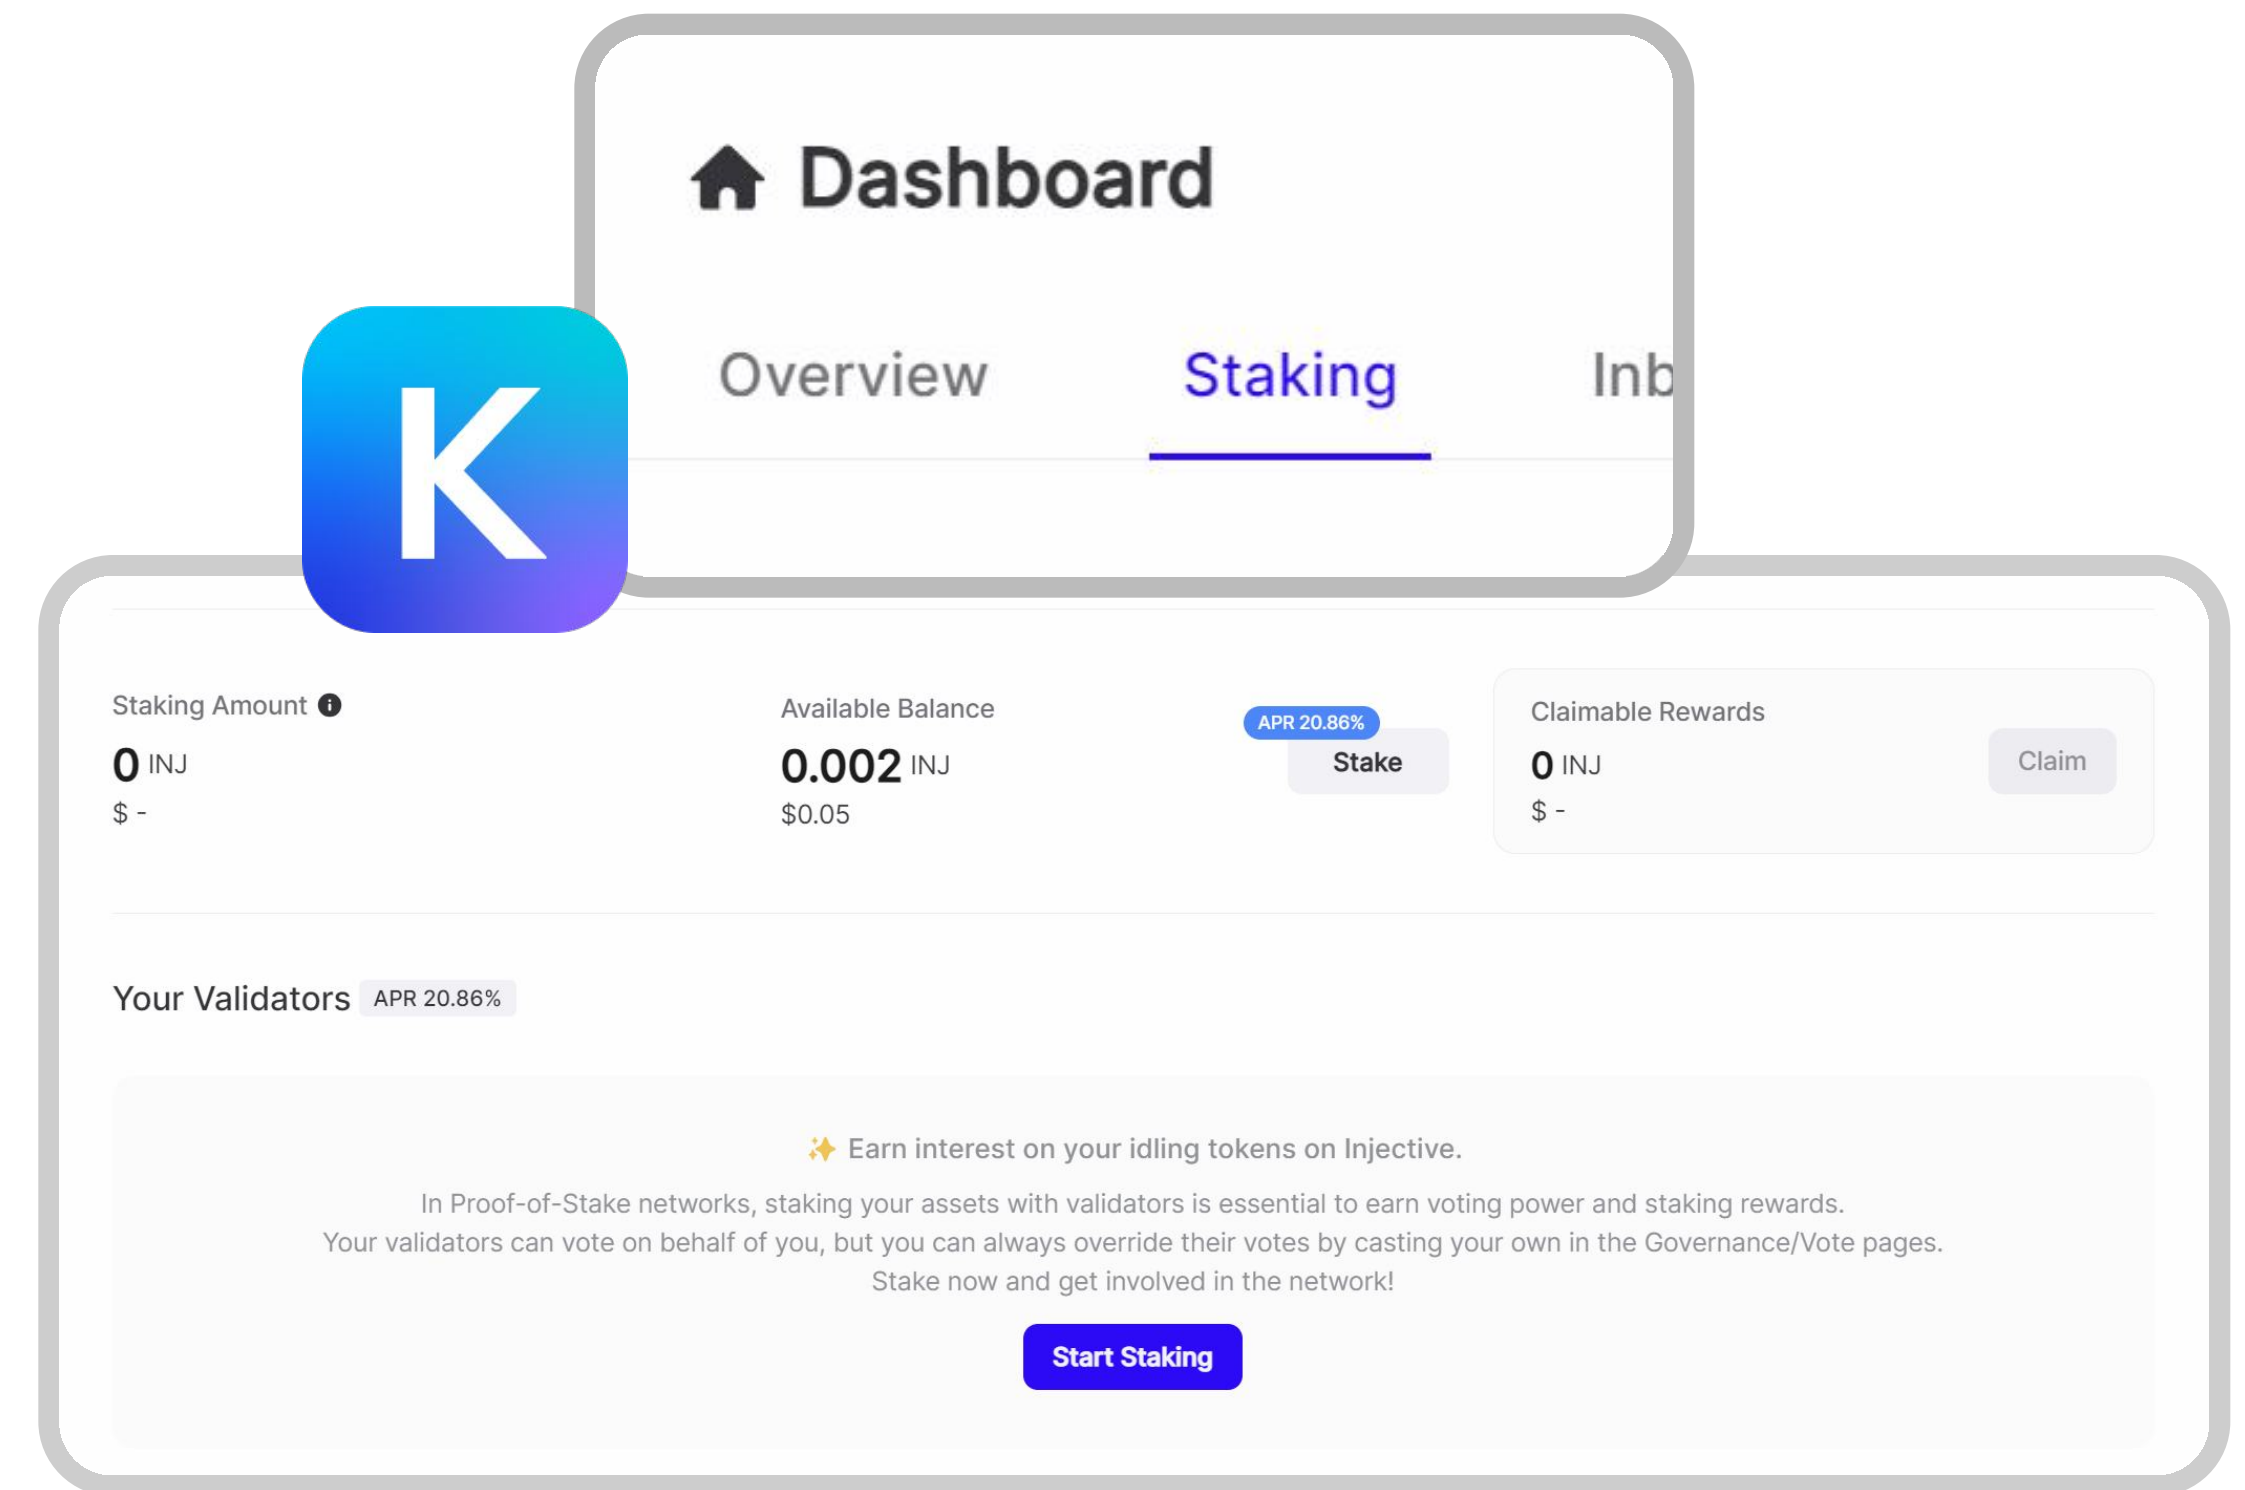

Stakefolio

Blockchain overview

Blockchain Overview

View properties of your assets on the selected blockchain

- View your Available Balance, Staked Amount, and other information
- Be sure to have enough for gas fees (service fees) at all times
- Click **Start Staking**

Stakefolio

Select Validator

Validators

Validators run the decentralised security infrastructure of the blockchain

- Choose a validator that has a good commission rate
- 5% is typically a good rate

The screenshot shows the 'Stake to' interface for the Injective chain. The 'Validators on Injective' section lists various validators with their logos and names. A red arrow points to the 'Commission' field of the 'Neptune Foundation' validator, which is set at 5%. The 'Expected APR (%)' is 19.82%, and the 'Unbonding Period' is 21 days. A 'Stake' button is visible at the bottom right of the validator details panel.

Validator	Commission	Expected APR (%)	Voting Power	Unbonding Period
Binance Staking				
Black Panther Delegate for...				
SCV-Security				
polkachu.com				
Citadel.one				
AutoStake Slash Protected				
Everstake				
Imperator.co				
PFC - Stake for \$SOUL airdrop				
Crosnest				
Stakely.io				
CryptoCrew Validators				
Neptune Foundation	5%	19.82%	1.21%	21 days

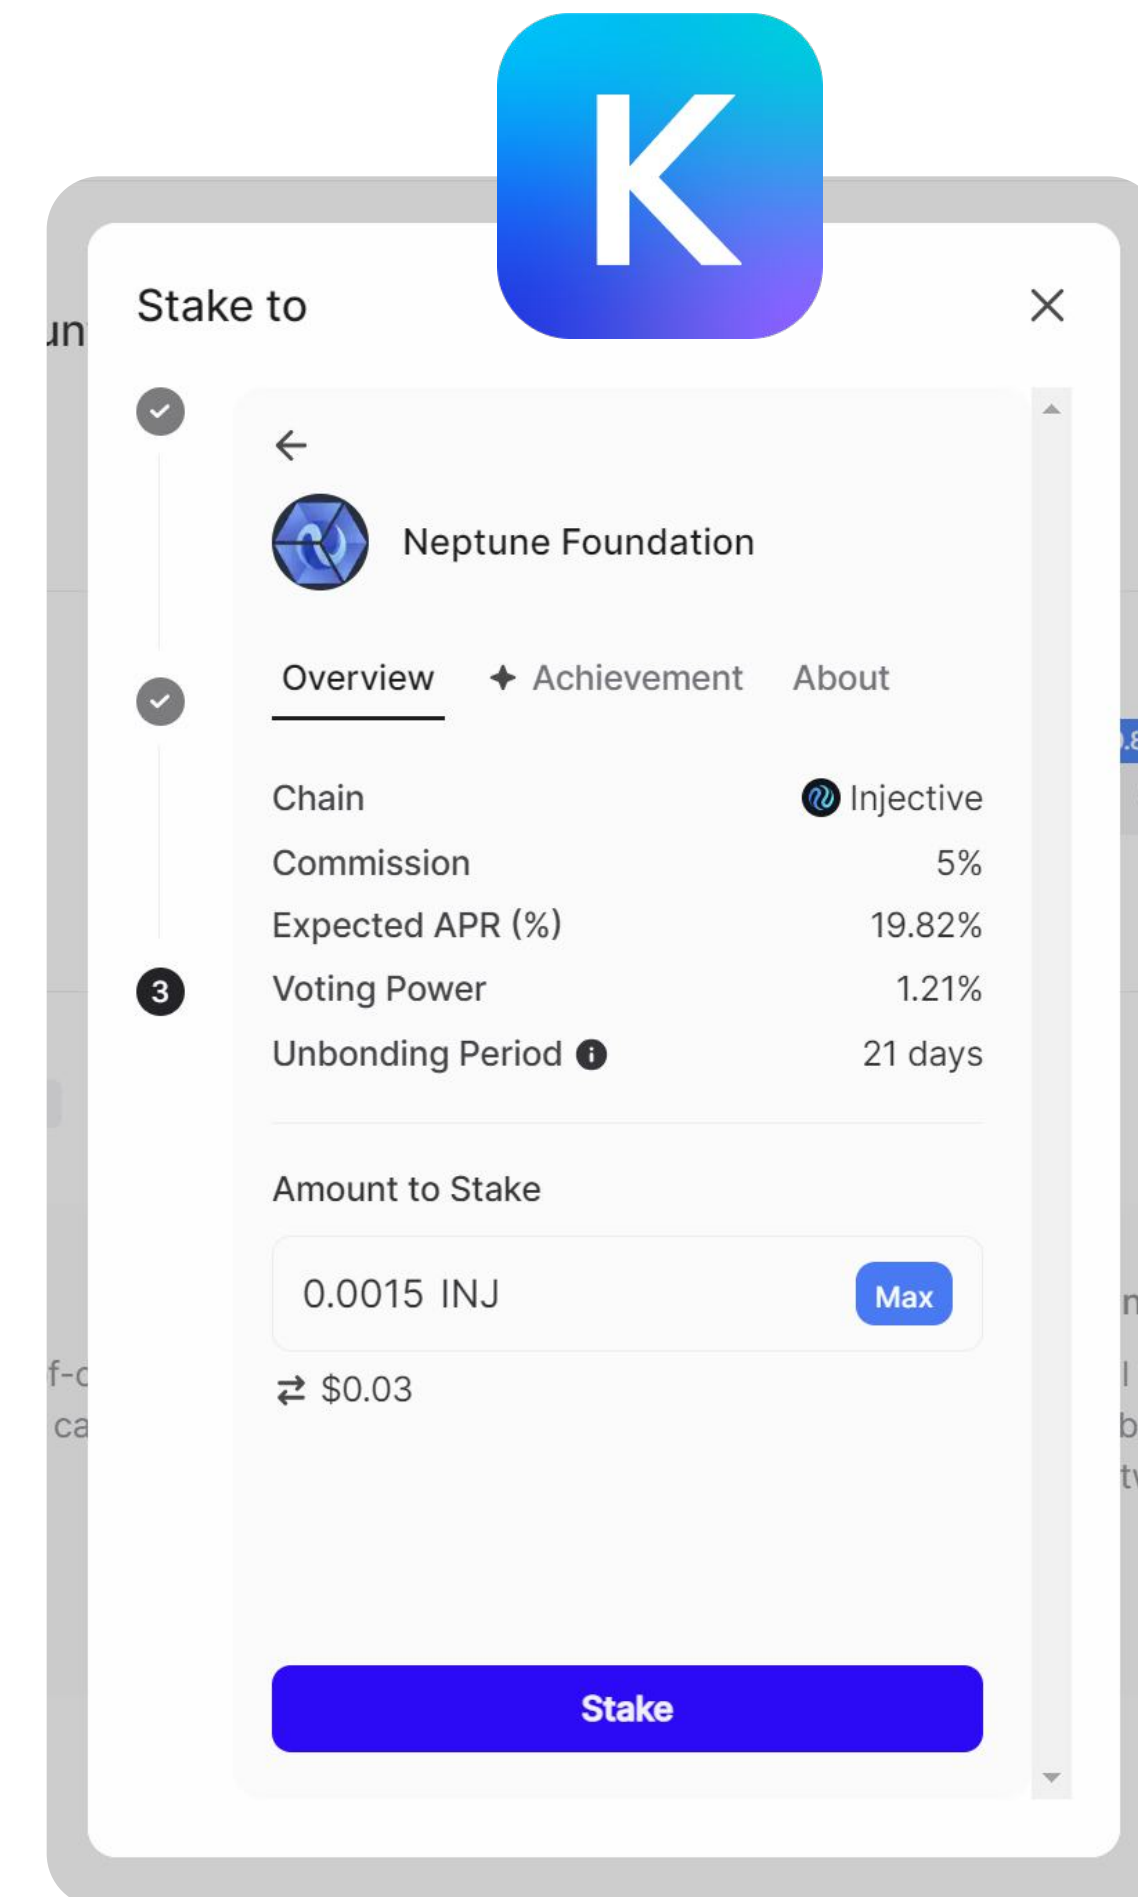

Stakefolio

Stake

Stake

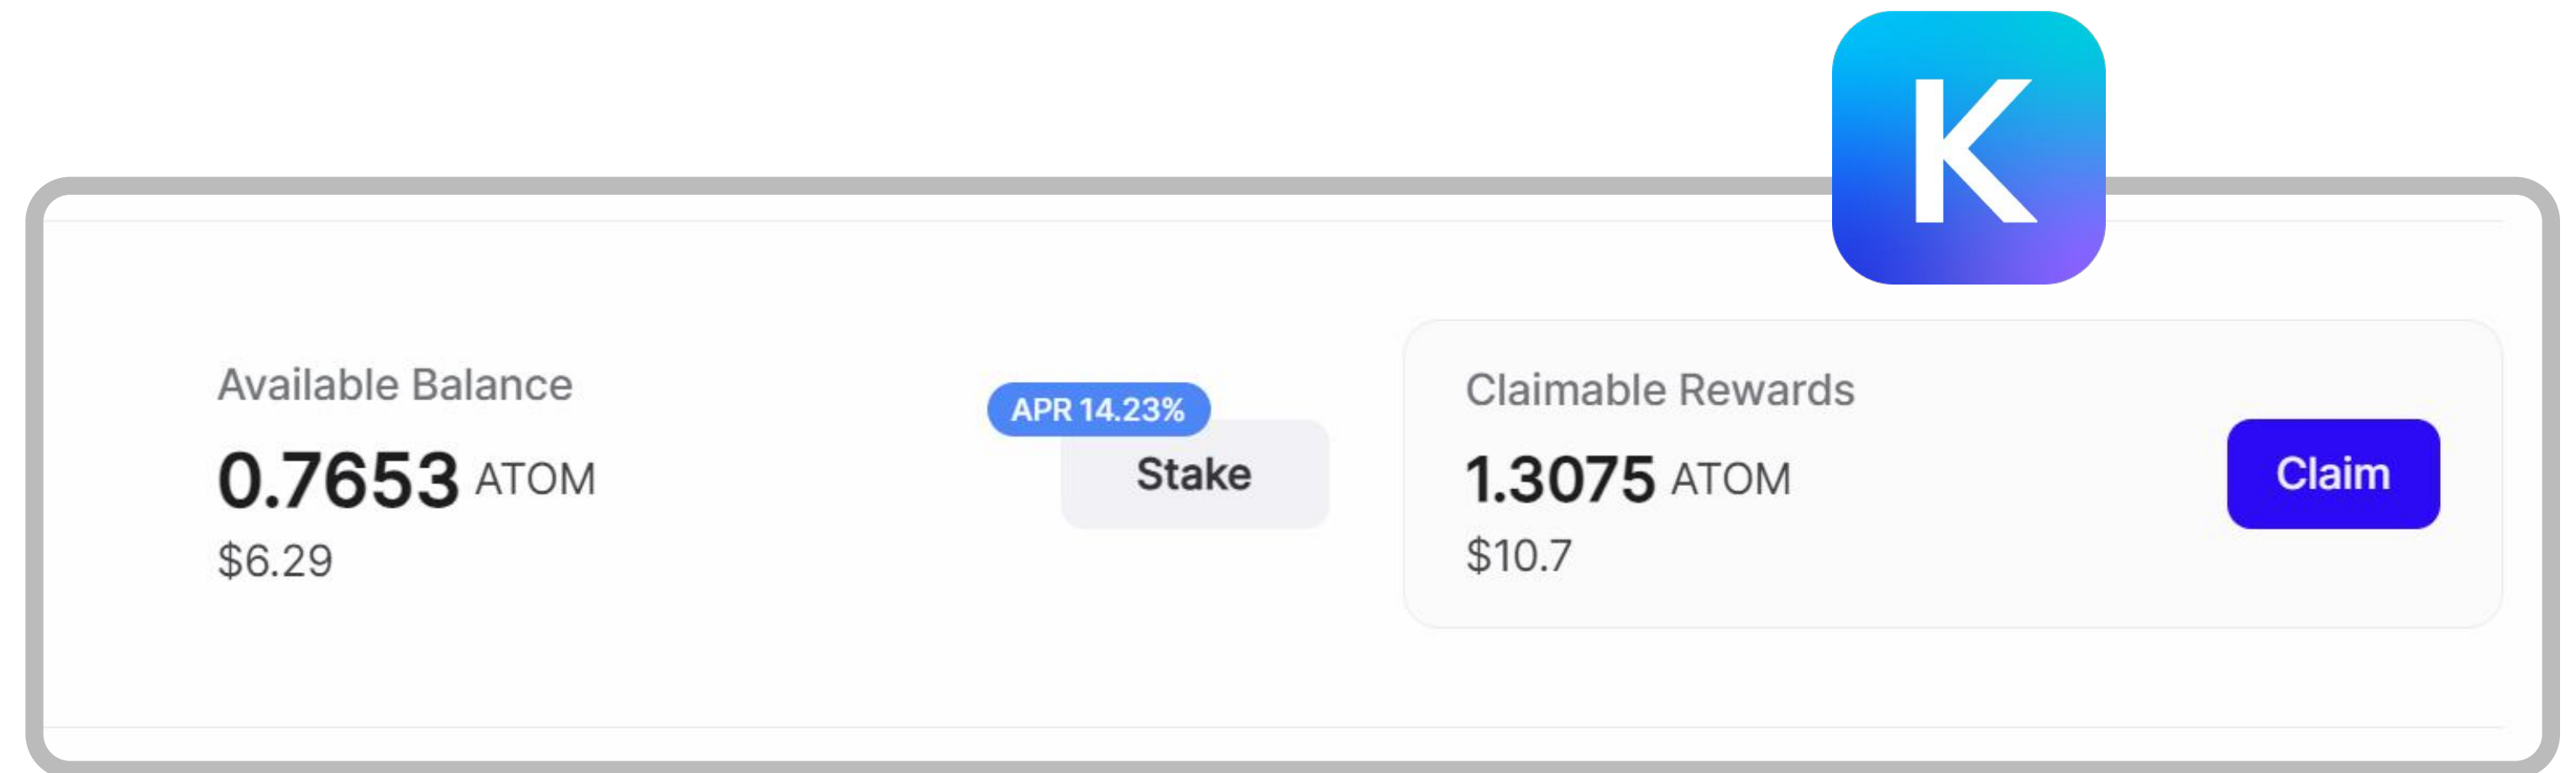

Once you choose a validator, input the amount to stake

- Don't stake all of your funds.
- Always leave some funds available to pay for fees.

Stakefolio

Claim rewards

The image shows a user interface for Stakefolio. At the top right is a blue square icon with a white 'K'. Below it is a large rounded rectangle containing the following information:

- Available Balance:** 0.7653 ATOM, \$6.29
- APR:** 14.23%
- Stake:** A button to stake the available balance.
- Claimable Rewards:** 1.3075 ATOM, \$10.7
- Claim:** A button to claim the rewards.

Rewards

Claim your rewards

- Once you have started staking, you will immediately start collecting a return
- Periodically you can claim your rewards, and restake to compound your APR

Stakefolio

Choose Validator and amount with Leap

Leap Wallet
Staking with Leap is done entirely within the wallet extension
